

Why JMobile

Overhauling industrial connectivity

Incompatibility between your industrial communication protocols and your customers IoT ecosystem won't longer be a limit.

Seamless Integration with more than 200 protocols

At the heart of JMobile's advantages is its protocol support, allowing for the **use of a single HMI software to manage projects across multiple PLC**. This TAG-agnostic approach not only simplifies the design process but also broadens the scope of compatibility, making it possible to work with all common PLCs. As a result, **JMobile facilitates the creation of tailored solutions** that can range from the most simple to the most complex, depending on the specific needs of the project and always cost-effective in terms of development time.

JMobile's compliance with **the OPC UA protocol underscores its readiness for Industry 4.0**, enabling easy connectivity and integration of machinery within the factory setting. . All machines can be connected (IIoT) with minimal effort, paving the way for a interconnected and automated industrial landscape. Through these capabilities, JMobile represents a **comprehensive solution that bridges the gap between current industrial requirements and the future of automation**.

In summary, JMobile stands at the forefront of industrial **connectivity**, embodying a blend of **versatility** and **security** that sets it apart in industrial applications. This **adaptability** is further enhanced by its commitment to secure data transmission, which is pivotal in ensuring reliable and secure solutions. And yet this is a software with more than 10 years of history in the field.

JMobile is a distinguished software suite in the industrial sector, offering robust communication solutions for the **Industrial Internet of Things (IIoT)**. This software is designed to facilitate seamless interaction between industrial machines and digital platforms, encompassing a range of functionalities from **edge to cloud connectivity**, device management, process management, and data visualization.

The X Platform world

In the dynamic world of industrial automation, the X Platform exists to bridge the gap between the aspirations of machine builders and the real-world needs of factory owners. The platform serves as a comprehensive toolbox, helping you address current challenges while preparing for future ones.

The X Platform is more than just technology; it's a partnership. It empowers you to tailor solutions to your unique challenges, ensuring that you remain at the forefront of industrial innovation. The goal is to give machine builders the freedom to focus on what they do best: creating outstanding machines that meet the needs of factory owners like you.

What is a Today's Need...

1. Edge Security - Protecting your data and your business.
2. Remote Access & VPN- Simplifying system integration, providing you with the ability to monitor and adjust processes anywhere.
3. FleetManagement - Making updates remotely: time and resource saving.

... a Tomorrow's Want ...

1. Remote & ConditionMonitoring - Giving you the tools for proactive diagnostics.
2. OEE & Energy Efficiency - Monitoring and managing resources for sustainable growth.
3. Performance Consultancy - Offering insights into optimizing your machinery's potential.

... and a Future Vision?

1. Marketplace Integration - Creating potential channels for resource and information exchange.
2. Virtual Logic Control - Preparing for the possibilities of AI-driven process enhancements.
