

Why eX200 Web Series

The new link for Industrial Automation Platforms

reliability of Made in Italy HMIs with the capacity of Industrial PCS

The new link for IIoT

EXOR eX200 Web Series: a powerful user interface that adjusts to needs.

The eX200 Web Series offers an advanced web browsing experience, particularly useful for IIoT applications.

The new HMI suits OEM needs: cabinet mounting, plastic case, multitouch display are the main hardware features, all of this supported by high web performance and connectivity benefits.

Main features

- 5" to 15" Touchscreen
- Capacitive Multitouch
- 64-bit CPU, 1.6 GHz
- 1 Ethernet port
- Web Browser
- CORVINA Remote Connectivity - Option

The web version differs from traditional systems.

It eliminates managing licenses, software installation, and configuration complexity.

Web-based systems enable app installation and execution through any browser, ensuring access to the latest versions.

Multi-core processor for increased computing power

High-performance browser with a high degree of software compatibility

Wide temperature range for performance in any situation

Cutting-edge user interface integrated into the BSP

The X Platform world

In the dynamic world of industrial automation, the X Platform exists to bridge the gap between the aspirations of machine builders and the real-world needs of factory owners. The platform serves as a comprehensive toolbox, helping you address current challenges while preparing for future ones.

The X Platform is more than just technology; it's a partnership. It empowers you to tailor solutions to your unique challenges, ensuring that you remain at the forefront of industrial innovation. The goal is to give machine builders the freedom to focus on what they do best: creating outstanding machines that meet the needs of factory owners like you.

What is a Today's Need...

1. Edge Security - Protecting your data and your business.
2. Remote Access & VPN - Simplifying system integration, providing you with the ability to monitor and adjust processes anywhere.
3. Fleet Management - Making updates remotely: time and resource saving.

... a Tomorrow's Want ...

1. Remote & Condition Monitoring - Giving you the tools for proactive diagnostics.
2. OEE & Energy Efficiency - Monitoring and managing resources for sustainable growth.
3. Performance Consultancy - Offering insights into optimizing your machinery's potential.

... and a Future Vision?

1. Marketplace Integration - Creating potential channels for resource and information exchange.
2. Virtual Logic Control - Preparing for the possibilities of AI-driven process enhancements.
