

Why XPLC

# Scalable Technology for control applications

A new programming system with the Standard PLC Language (IEC 61131-3).

## The PLC fully integrated in X Platform landscape

XPLC is a versatile and practical solution for industrial automation. It is designed to make operations more efficient and adaptable. Flexibility means it can handle a wide range of control tasks, from simple logic controllers to complex automation and motion control systems. This adaptability is a significant advantage, as it allows to use a single platform for various applications, reducing complexity and costs.

*“XPLC is a practical tool for those looking to streamline their industrial automation application development processes, reduce costs, and improve overall efficiency.”*

The platform’s user-friendly features, such as easy debugging and integrated device configuration, simplify work and save time. This means to get projects up and running faster, increasing productivity. Adhering to industry standards and offering a rich library of resources ensure compatibility and make it easier to collaborate in the industry.

-  Scalability and portability
-  Programming language IEC 61131-3
-  Real Time control
-  PLCopen certified

# The X Platform world

In the dynamic world of industrial automation, the X Platform exists to bridge the gap between the aspirations of machine builders and the real-world needs of factory owners. The platform serves as a comprehensive toolbox, helping you address current challenges while preparing for future ones.

The X Platform is more than just technology; it's a partnership. It empowers you to tailor solutions to your unique challenges, ensuring that you remain at the forefront of industrial innovation. The goal is to give machine builders the freedom to focus on what they do best: creating outstanding machines that meet the needs of factory owners like you.

## What is a Today's Need...

1. Edge Security - Protecting your data and your business.
2. Remote Access & VPN - Simplifying system integration, providing you with the ability to monitor and adjust processes anywhere.
3. Fleet Management - Making updates remotely: time and resource saving.

## ... a Tomorrow's Want ...

1. Remote & Condition Monitoring - Giving you the tools for proactive diagnostics.
2. OEE & Energy Efficiency - Monitoring and managing resources for sustainable growth.
3. Performance Consultancy - Offering insights into optimizing your machinery's potential.

## ... and a Future Vision?

1. Marketplace Integration - Creating potential channels for resource and information exchange.
2. Virtual Logic Control - Preparing for the possibilities of AI-driven process enhancements.

Your Objective,  
Your Solution,
