

EVENTS

SPS Parma, Italy | Smart Production Solutions

[Read More >](#)

EXOR International could not miss this event and is waiting for you in Hall 3 with a stand of over 150 square metres dedicated to **innovations in the Hardware, Software and Cloud sectors**: areas dedicated to getting to know the products and their applications, increasing performance thanks to **JMobile and CORVINA** and the digitalization solutions that have led EXOR to be one of the first Italian companies to be **fully digitalised**.

NEW PRODUCTS RELEASED NOW

JSmart700M | Powerful Smart PoE HMIs

[Read More >](#)

JSmart700M products give a performance boost to the successful JSmart700 series while they confirm the unique selling points and benefits of the series:

- **PoE** connection
- **Wi-Fi** interface and **NFC** device
- **Multitouch** display and robust glass front
- Full set of motion and environment **sensors**
- Ready for installation with **support arm**, IP67 all-around

eX700M | Powerful Multi-purpose HMIs

[Read More >](#)

eX700M products give a performance boost to the successful eX700 series and confirm the unique selling points and benefits of the eX700 series:

- **Multitouch** display and robust glass front
- 3 Ethernet ports and expandability with plug-in modules
- Full range of **certifications** for extreme working environments, maritime and industrial
- **Ready for installation** of CODESYS PLC runtime software with a full selection of network stacks for I/O

X715MG | IoT edge applications in extreme environments

[Read More >](#)

eX715MG is the ideal choice for all demanding IIoT edge applications in extreme environments such as marine and process industries where powerful and performing HMI or IoT Controller is needed.

The glass projected capacitive touchscreen and the brilliant **15-inch widescreen display** are manufactured using optical bonding to ensure highest optical performance even in sunlight and optimal **resistance to liquids, dust and high temperatures**. As with all eX700 Series products have been designed to run the JMobile software.
